# HealthCare365<sup>TM</sup>

## HealthCare365 - a great complement to an existing EMR/EHR

- o Ensure integrity and confidentiality of all documents and information
- o Manage unstructured content like supporting patient information and back-office documentation
- o Improve compliance through audit functionality and document security of PHI
- o Use one central access point to all information
- o Work with files locally or remotely through secure and controlled access
- o Support billing accuracy through added functionality like file completeness, etc.
